FACTS

360,000 people die each year in the U.S. from sudden cardiac arrest.

For every minute that passes without treatment, survival is reduced 10%.

Knowing CPR is imperative to help save a life because EMS response times often exceed 12 minutes.

When sudden cardiac arrest occurs every minute counts. Early CPR will keep the brain alive & your aed will restart the heart.

Early defibrillation increases survival to 75%.
