

Ulster County Transportation Council

2013 Traffic Monitoring Report

**For the Towns of
Denning, Esopus, Gardiner, Hurley, Kingston, Lloyd, Marbletown, New
Paltz, Olive, Plattekill, Rochester, Rosendale, Saugerties, Shandaken,
Shawangunk, Ulster, Wawarsing, and Woodstock; the
Villages of Ellenville and New Paltz; and the
City of Kingston**

May 2014

**Prepared By:
Ulster County Transportation Council
244 Fair Street
Kingston, NY 12402-1800**

Ulster County Transportation Council

2013 Traffic Monitoring Report

This report was funded in part through grants from the Federal Highway Administration and Federal Transit Administration, divisions of the U.S. Department of Transportation. The views and opinions expressed herein do not necessarily reflect those of the U. S. Department of Transportation.

Ulster County Transportation Council

Policy Committee Members

Michael Hein, County Executive **UCTC Chair**

Shayne Gallo, Mayor
City of Kingston

James Quigley III, Supervisor
Town of Ulster

Greg Helsmoortel, Supervisor
Town of Saugerties

Gary S. Bellows, Supervisor
Town of Hurley

Thomas Madison, Jr., Executive Director
NYS Thruway Authority

Jason West, Mayor
Village of New Paltz

John K. Coutant, Supervisor
Town of Esopus

Michael E. Warren, Supervisor
Town of Marbletown

Leonard Distel, Supervisor
Town of Wawarsing

Stephen Osborn, Supervisor
Town of Marlborough

Paul Landi, Supervisor
Town of Kingston

John Valk, Jr., Supervisor
Town of Shawangunk

Joan McDonald, Commissioner
NYS Department of Transportation

Dennis Doyle, Director
PO Box 1800

INTRODUCTION

The Ulster County Transportation Council's (UCTC) Traffic Monitoring Program is a task identified within the adopted SFY 2013-2014 Unified Planning Work Program (UPWP). The purpose of the Traffic Monitoring Program (TMP) is to regularly collect and monitor traffic volumes on and off the State road system to help analyze trends and update traffic volume forecasts. The collection of traffic counts also helps to satisfy Federal Congestion Management Process (CMP) requirements for the Transportation Management Area (TMA). A total of 64 non-State road traffic counts were collected on behalf of the UCTC in 2013. In addition, NYSDOT Region 8 staff provided an additional 152 counts collected in 2013.

The TMP assists with the evaluation of traffic volume trends and is utilized in programming funds for Federal, State and local transportation projects. Traffic count data also provides information relevant to implementing traffic engineering improvements, modifying traffic control strategies, and developing long and short-range highway improvement plans. To establish trends, UCTC's traffic count program recounts locations every 3 years. Traffic count locations for 2013 were last conducted in 2010.

DATA DESCRIPTION

Of the 225 total counts collected by UCTC and NYSDOT, 3 are on U.S. Highways, 21 on State roads, 31 on entrance or exit ramps, 42 on County roads, and 128 counts on local roads. Data collected includes the raw volume count including Peak Hour (4-5 PM) volume counts. The Annual Average Daily Traffic (AADT) count is generated from the raw counts. Detailed hourly traffic volume counts can be obtained by contacting UCTC staff.

The UCTC traffic volume counts were collected in April and May 2013. The NYSDOT traffic volume counts were collected in April through May, and July to November of 2013. To meet the minimum NYSDOT standards, all traffic volume counts within this report have a minimum 48 consecutive hours of data collected.

Additional count data is available on the NYSDOT website at:

<https://www.dot.ny.gov/divisions/engineering/technical-services/highway-data-services>.

Count data for prior years is also available on the UCTC website at:

<http://www.co.ulster.ny.us/planning/tcount.html>.

DATA DISCLAIMER

To ensure accuracy of the data and to eliminate external variables, the standards for traffic monitoring set forth in NYSDOT Engineering Bulletin 11-030 are closely followed during data collection. During processing, each count interval is reviewed and erroneous intervals are eliminated to ensure that actual traffic conditions are represented. These counts are then compared against historic values for the station accounting for background growth rates, regional changes, seasonality, and vehicle class distribution.

While every effort is made on the part of UCTC to provide valid and current information, UCTC offers no guarantees as to the accuracy of this information and urges the use of independently conducted counts for verification.

DESCRIPTION OF TABLES

The UCTC Traffic Monitoring Report is summarized into three main tables. Table 1 is sorted by station number and Table 2 is listed by municipality. Table 3 provides a comparison between the 2010 and 2013 count data. The tables include the following data:

Municipality - Indicates the city, town or village where the count was taken. The prefix “C/”, “T/” or “V/” is substituted for city, town or village, respectively.

Road Name - Indicates the road where the count was taken. State roads are identified with United States (US) or State Route (SR) prefixes. County roads are listed with the County Road (CR) prefix. Local roads are identified by their common names.

Station Number - Indicates the reference number for a specific traffic volume count location. These numbers are generated and assigned by UCTC and NYSDOT staff.

From/To - Indicates the name of the roads at the beginning and end of a road segment where the count was taken.

Average Annual Daily Traffic - AADT - Traffic volumes are expressed in terms of Annual Average Daily Traffic (AADT), a standard measure of two-way daily volume. Each AADT represents the number of vehicles traveling over a designated section of highway. Based on established formulas, a measured traffic count is factored to an AADT by adjusting for seasonality and vehicle classifications. Adjusting for seasonality is necessary because each season undergoes an increase or decrease in traffic volumes. Counts are adjusted for vehicle classifications since trucks with three or more axles appear as several cars to the counters.

Peak Hour - 4 to 5 PM - For the purpose of this Report, the PM peak hour volume was assigned to be between 4:00 PM and 5:00 PM. Actual PM peak hour volumes may be higher on some roads at different hourly intervals.

Data Sources - The counts for UCTC were collected by Tri-State Traffic Data, Inc. of Pennsylvania in coordination with UCTC staff. NYSDOT counts were collected by NYSDOT staff or contractors.

DESCRIPTION OF MAPS

The report includes five maps. Three of the five maps divide the County by region to show station numbers by location. The fourth map shows percent change between the 2010 and 2013 count data and the fifth map shows the count locations for 2011, 2012 and 2013.

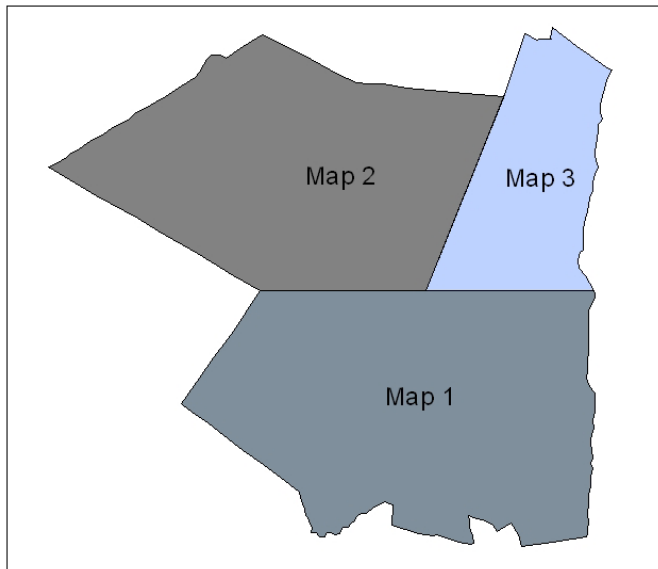

Map 1 - Southern Ulster County - includes the towns of Esopus, Gardiner, Lloyd, Marbletown, Marlborough, New Paltz, Plattekill, Rochester, Rosendale, Shawangunk, Wawarsing, and the villages of Ellenville and New Paltz;

Map 2 - Northwestern Ulster County - includes the towns of Denning, Hardenburgh, Hurley, Marbletown, Olive, Shandaken, and Woodstock;

Map 3 - Northeastern Ulster County - includes the towns of Hurley, Kingston, Saugerties, Ulster, Village of Saugerties, and the City of Kingston.

Map 4 - Percent Change in AADT - shows the change in AADT between the year 2010 and 2013.

Map 5 - Count Locations by Year - shows all the counts collected in 2011, 2012 and 2013. This map may be used to locate station numbers that can be referenced to the individual report years or by contacting UCTC.
