

# Ulster County Non Motorized Transportation Plan

Task 4 - Project Identification

**Project Identification/ Prioritization Process** 

August 1, 2007

# Identifying and Prioritizing NMT Projects

As part of the Draft NMT Plan, potential projects will be prioritized using criteria and a scoring system. NMT projects and programs of the highest quality will be identified based on their ability to provide benefits to the County in terms of health, mobility, safety, the environment and economy. More than 600 projects were identified during the public input process. The prioritization process will allow the Review Committee (PRJ) and the Consultants to consolidate the list into approximately 100 potential projects and provide input for the Project Recommendations section of the NMT Plan. The scoring system will be used with the full NMT Technical Advisory Committee (NTAC) to develop a list of approximately 15 high priority projects, and to group all of the proposed projects into phased recommendations for Tier 1, Tier 2, and Tier 3, as follows.

- >75 Points: Tier 1 projects are the highest potential projects for near-term project or program development within 1-5 years.
- 50-75 Points: Tier 2 projects are projects and programs that can supplement the NMT initiative within 6-10 years.
- <50 Points: Tier 3 projects are included as long-term potential projects and programs over the next 10-20 years.

The following are the steps involved in this part of the planning process:

1: The consultant will integrate comments from the Project Review Committee (PRJ) into the Identification Criteria. The consultants will use these Criteria to develop the list of 100 proposed projects.

2: The consultant will integrate comments from the Project Review Committee (PRJ) into the Prioritization Matrix. The NTAC will score the 100 projects and submit their prioritization rankings to the consultant. At the committee's discretion, projects from Tiers 1, 2, or 3 can be considered for more detailed analysis by the consultants as High Priority Projects. This will allow for potential long-term projects to be advanced towards implementation along with 'early win' projects that can be developed in the short term.

3: The consultant will compile the results of the prioritization process and use them to develop the High Priority Projects section of the NMT Plan.

The identification and prioritization criteria are described in the table on the following page, followed by a prioritization matrix that will be used in scoring the projects. Based on the identified priorities, individual project description sheets will be developed for up to 20 priority projects.

| Ulster County NMT Pla    | an:     |
|--------------------------|---------|
| Project Identification C | riteria |

| Criteria                                     | Description   | Woight              |
|--|---|---------------------|
| Environmental Benefits                       | Description           Provides conservation values, carbon           neutral / energy reduction benefits           and/or connects people to nature   | <b>Weight</b><br>10 |
| Resident and Visitor<br>Benefits             | Provides health, economic, and quality of<br>life benefits, including increased access to<br>physical activity, improved property<br>values, and community enhancement  | 10                  |
| Transportation /<br>Connectivity             | Provides transportation and recreational<br>access to activity centers (schools,<br>employment and commercial districts,<br>parks and public lands) and/or increases<br>potential use of non-motorized travel | 20                  |
| <b>Regional Benefits</b>                     | Potential to link into a network that<br>extends throughout the County or<br>provides NMT benefits to multiple<br>communities   | 10                  |
| Multiple Use                                 | Walking, bicycling, in-line skating,<br>equestrians, water trails and a diverse<br>range of user groups will benefit from the<br>proposed project or program.   | 10                  |
| Agency Support                               | The project has the support of the<br>agency responsible for its development,<br>or has demonstrated public support that<br>can lead to long-term success.  | 5                   |
| Enhances Safety for Non-<br>Motorized Travel | The project will improve NMT safety,<br>including people traveling along and<br>across roadways, bridges, railroads, and<br>waterways.  | 20                  |
| Geographic Diversity                         | Provides geographic diversity of project<br>and program locations.  | 10                  |
| Implementation                               | Ease of implementation based on the<br>following factors: intact rights-of-way,<br>funding, or design constraints   | 5                   |

# Ulster County NMT Plan: **Project** <u>**Prioritization**</u> **Criteria**

| Criteria   | Points   | Maximum Score |
|--|--|---------------|
| <b>Transportation</b> : Increases the use of non-motorized travel to destinations  | Access to Schools: 0-3 points max<br>Access to Employment and Retail: 0-3<br>Access to Parks & Recreation: 0-3<br>Access to Transit: 0-3<br>Access to Residential Neighborhoods: 0-3   | 15            |
| <b>System Connectivity:</b> Provides an essential link in creating a continuous NMT system within the study area.                            | <ul> <li>Provides an essential link in the proposed network; without this link, the system could not be completed: 15-20 points</li> <li>Important as a 'stand alone project, but not critical to the overall system: 5-15 points</li> <li>A long-term element and potential future link in the system: 0-5 points</li> </ul>  | 20            |
| Quality of Life Benefits: Project will<br>provide quality of life benefits to the<br>residents, visitors and businesses of<br>Ulster County. | Increases Tourism: 0-4 points max<br>Environmental / Energy Benefits: 0-4<br>Potential to attract / retain businesses: 0-4<br>Increases Public Health / Fitness: 0-4<br>Improves Traffic Safety: 0-4   | 20            |
| Multiple Use: Allows for a variety of user groups  | Bicyclists: 0-3 points max<br>Pedestrians / Runners: 0-3<br>Water Trail: 0-3<br>Equestrian: 0-3<br>X-C Skiing / Skating: 0-3   | 15            |
| <b>Agency Support:</b> Project is supported<br>by the organization(s) responsible for<br>its implementation and management                   | Project has full agency support (7-10 points)<br>Project has potential to receive agency support (minimal<br>"Cost to Readiness") (3-6)<br>Project may be able to receive future support (0-3)   | 10            |
| <b>Cost:</b> Project can be implemented<br>within the costs provided based on<br>identified opportunities and<br>constraints                 | Project finity be able to receive future support (6.5)<br>Project can be implemented within the following range of<br>unit costs:<br>Less than \$200k / mile or location (8-10 points max)<br>\$200k - \$500k / mile or location (3-7 points)<br>Greater than \$500k / mile or location (0-2 points)<br>Non-Capital Projects: 0-10 points based on ability to reach<br>the widest range of people per unit of cost required to<br>develop policy or programs | 10            |
| <b>Implementation:</b> Project or program<br>is ready to be advanced to<br>implementation  | Presents significant constraints<br>(0-2 points)<br>Requires further study but has the potential to be advanced<br>(3-7 points)<br>Feasible and ready for implementation (8-10 points max)   | 10            |

Potential non-motorized Transportation project ideas were compiled from the following sources:

- Woodstock , New York Public Meeting
- Highland, New York Public Meeting
- On-line web survey
- Written Comments Received from Outreach Letter to Ulster County Municipal Officials & Educators
- E-mail Comments Received via Project Web Site
- Non-motorized Transportation Plan Advisory Committee
- Ulster County Transportation Council Staff
- Consultant Staff

This process resulted in over 600 separate responses prompting the need for sorting by program type. This sorting is summarized in the tables below.

| Program Type                            | # of Comments | Percent | # of Projects |
|---|---------------|---------|---------------|
| Total                                   | 599           | 100.0%  | 100           |
| On-street Bicycle Facilities            | 138           | 23.0%   | 23            |
| New Trail development                   | 88            | 14.7%   | 15            |
| NMT Policy (Local-5, County-2, State-3) | 57            | 9.5%    | 9             |
| Connections / Complete Existing Trail   | 46            | 7.7%    | 8             |
| Equestrian                              | 35            | 5.8%    | 3             |
| Pedestrian (sidewalks/crosswalks)       | 30            | 5.0%    | 5             |
| Education                               | 27            | 4.5%    | 4             |
| Demonstration Projects                  | 25            | 4.2%    | 5             |
| Water Access                            | 25            | 4.2%    | 4             |
| Enforcement                             | 17            | 2.8%    | 3             |
| Safe Routes to School / School policy   | 17            | 2.8%    | 3             |
| Partnership / Advocacy                  | 13            | 2.2%    | 2             |
| Safety (Revise based on Crash Data)     | 13            | 2.2%    | 2             |
| Signage                                 | 11            | 1.8%    | 2             |
| Transit                                 | 11            | 1.8%    | 2             |
| Tourism                                 | 9             | 1.5%    | 2             |
| Health                                  | 8             | 1.3%    | 1             |
| Maintenance                             | 8             | 1.3%    | 1             |
| Trails in Highway Corridors             | 4             | 0.7%    | 1             |
| Utility Corridors / NYCDEP Aqueduct     | 3             | 0.5%    | 1             |
| Bike Parking                            | 6             | 1.0%    | 1             |

| Capital Maintenance         | 1            | 1.0%         |
| Signage                     | 1            | 1.0%         |

The top 100 list was developed by analyzing the 600 projects that had multiple responses and fit within the scope of the NMT process. Projects with multiple requests were prioritized and assembled into the project summary. The "Top 100" list was then cross referenced with those projects that already had been awarded or proposed for funding via the MPO Transportation Improvement Process (TIP), or had previous / ongoing planning efforts. Other projects based on crash analysis, geographical diversity, and gap analysis were added to the list by the consultant team as appropriate. Inclusion in the MPO TIP process or other ongoing planning efforts did not preclude projects from the "top 100 list" but it will play an important role in whether or not further study efforts are pursued within the context of the NMT 15 High Priority Project process for development into project description sheets. The following list shows the project list by item, locality, and program type. The actual scoring values by criteria are shown at the end of this document.

| Rank<br># | Item  | Locality           | Program<br>Type   |  |  |  |
|-----------|---|--------------------|-------------------|--|--|--|
| 1         | Share the Road Campaign   | County             | Encouragement     |  |  |  |
| 2         | Adopt MPO Funding Policy for % of Funding for NMT   | County             | Policy            |  |  |  |

# **Ulster NMT: Phase 2 Project Descriptions**

# Draft: July 17, 2007

The following list was developed from public involvement and project team suggestions developed during the first phase of the Ulster NMT Plan. Projects were identified and prioritized using a scoring matrix. The list was balanced to include a range of bike/ped/trail facilities and programs, and to represent the geographic diversity of Ulster County. Note that these projects will be advanced to a more detailed level during the NMT Plan, but they are not necessarily the top priority projects for the County. Other priority projects are currently being advanced to implementation or are currently listed on the TIP for funding. The following projects represent the next phase of NMT projects for future development in Ulster County.

# 1. Hudson River "Legacy Trail" Kingston North to Saugerties

Develop concept plan for a new shared use trail that would extend the Hudson River Greenway trail system. This corridor does not have a defined existing right of way, but is an important long-term connection.

# 2. Trail - Kingston South to Rosendale (Trestle)

Upgrade this critical link in the Ulster County system. Identify access issues and alternatives for re-decking the historic trestle. Concept will be based on previous planning concepts for the Rail Trail and the D&H Canal Corridor.

## 3. Trolley Museum Trail to Kingston Point (RWT)

Extend the existing trail at the Trolley Museum through the Rondout to Kingston Point. This project was identified in the Ulster County RWT study, and is a first phase towards the proposed RWT corridor trail.

## 4. RT 299 Bike Demonstration Corridor

East-west connection between the Hudson Valley Rail Trail and future access to the Minnewaska/Mohonk Carriage Trail network. Concept will include a combination of path, bike lane and other innovative on-street / intersection improvements.

## 5. Route 9W Bikeway

On road bikeway from the Mid-Hudson Bridge to Kingston, including potential improvements to signage, shoulders and intersections.

# 6. Woodstock - Art Walk & West Main Sidewalks

Connection west of town center to Post Office, including integrated public art elements to enhance the streetscape.

## 7. Phoenicia Hamlet Bike/Ped Improvements

Main Street model "Best Management Practices" improvements in hamlet center. This will be a

#### 8. Kingston Ward 9 Bike/Ped Improvements

Urban neighborhood bike, pedestrian and traffic calming improvements.

#### 9. County Share the Roads/Drive Less Live More Program

Education and encouragement program to communicate right-of-way compliance and reduced automobile dependence.

#### 10. County Wide Bike Parking Program (Municipal Facilities)

Program to provide bike racks at libraries and municipal offices.

#### 11. SR2S - Plattekill Elementary School

Bike / ped improvements in school zone to encourage improved safety and access.

#### 12. SR2S - EG Myer School, Hurley

Bike / ped improvements in school zone to encourage improved safety and access.

#### 13. Mountain Bike Park - West of Kingston

Improved access and trail development of a destination facility for off-road bicycling.

#### 14. Crash Locations - Town of Ulster - Lucas/Ulster Aves

Traffic safety improvements to identified bike/ped crash location.

#### 15. Crash Locations - Ellenville Route 209

Traffic safety improvements to identified bike/ped crash location.

#### 16. Central Place to NMT System Access Management

Provide policies and recommendations for improving access and linkages to existing and proposed non-motorized transportation system links from residential and commercial land use centers. This will be addressed in Policy Section of Draft Plan and / or in Hamlet Executive Summaries
