

Ulster County Government Sustainability Initiatives: Environmental Executive Orders, Laws, Resolutions, Plans & Procedures

(Updated October 2022)

This Compilation

This collection of sustainability initiatives was compiled to serve as a reference, where applicable, to Ulster County's municipal governments while reviewing operations and considering ways to improve sustainability. The Executive Orders, laws, resolutions, and procedures in this guide can be used as templates, "first drafts", or as starting points for discussions among local law makers.

Additional Resources

There are many other resources available to help municipalities with their sustainability initiatives. For example, Ulster County engages in a comprehensive bidding process for many products, including "green" products, used by the County. Local municipalities can purchase off of the County's awarded bids. This can save time and money for municipalities while ensuring that the products meet specified environmental and health standards.

In addition, Ulster County's many environmental initiatives and programs are documented online at <http://ulstercountyny.gov/environment/>.

For additional information on any of the Executive Orders, laws, resolutions and procedures included in this guide, please contact the Ulster County Department of the Environment at (845) 340-4298 or environment@co.ulster.ny.us.
