Dear Migrant Farm Worker Housing Owner/Operator:

When required, we will collect a surveillance water sample(s) for coliform bacteria. We will attempt to take these samples during your pre-operational inspection.

Please keep in mind that you must take one nitrate sample each year. The labs on the enclosed list can provide that service for you.

If you have any questions regarding these requirements, please feel free to call James Rodden at 845-340-3021.
